

Prognosis

Posted by Kim - 13 Feb 2011 17:38

This is the latest article by DocSarah as promised.

It is still under Articles - Test - Prognosis of Arachnoiditis. The full article is 17 pages long and in small type face. I am looking to edit it down into chapters more easily to print out just what is needed.

Also, I am now word blind so will need a day or two to pick up any typo's left in.

This report was very much written for the medical profession to read so the language is not DocSarahs' usual style.
