

MIRTAZAPINE

Posted by helen - 08 Apr 2011 10:47

Hi everyone,

I'm being weened off Amytriptaline due to bladder problems, urine retention. My GP has asked me to try Mirtazapine. Has anyone tried this drug for depression and chronic pain?

Any thoughts/information would be greatly appreciated.

Take care, Helen

Hi Helen, i tried it about a month ago. I took it in addition to my regular Venlafaxine but it zonked me out. VERY sleepy! So i stopped after only a few days.

Hi Kev

You're always "QUICK OFF THE BALL" thanks!!

I've managed to get through a few days on the low dose of Mirtazapine so will continue. I am now on a cocktail of 10mg amy 15mg Mirtaz and Diazepane in various doses to sleep. Will keep all informed.

Thanks again for your help - much appreciated. 😊

Helen

Thanks Helen. 🙏
I'm often a lone lurker on here! 🙏

I was also on 15mg mirtaz
