hi!

I came back to this site after an extended absence-gmedic was old name- but i can't seem to keep from posting twice! 🤔
I just hit post, then the site always has to be "refreshed" w/o ever showing the forum. after i refresh it all is well except there is 2 of my posts!!! I tried to cancel or erase one of them under "edit" but then I got 3:woohoo: posts!!!

Can ya help me? or do I just need to get it right the first time? LOL! 🤔
