

## Dayton 386, are you still around?

Posted by attheinlet - 30 Nov 2014 06:19

---

I saw your post about your daughter, and with the exception of the date listed of 2014, this was exactly the same post my Dad was writing about me. Down to the two myelograms and an exercise in Sept triggering it. Did she get an arach diagnosis? I got mine the last weekend of JAN 2014 and it was seconded by MRI read by Dr. Aldrete. He is the only doctor who has written two textbooks on Arachnoditis. Doc Sarach published the e book ' Adhesive Arachnoditis Syndrome '.

Let me know what is going on if you get this

=====
