

Same old Muscle Cramps - stronger than ever !!

Posted by helen - 17 Oct 2017 11:59

Hi everyone

Helen back with same old problem, severe muscle cramps all over and now Lorazepam not working. Doctor lost for ideas, so suggested I try going back to Diazepam.

Can't believe there's no other drugs available (other than Baclofen which I can't tolerate). Any ideas would be very welcome.

Thanks for your patience, best wishes to you all, and wish you 'low pain' days ☺

Hello Helen,

So sorry to hear that you are having horrible muscle cramps

I do get them but not as bad as you i only get what they have told you to take

i hope that somebody will post something that can help you

sending you lots of love

Ann xxx

Thanks Ann, feel even worse on Diazepam, just spoke to the Doc and he reckons I'm suffering bad withdrawal effects. He said go back to Lorazepam as they're 10 x stronger !!

Hope bad attacks of the last few months calms down - just makes you feel at a complete loss. There's

no drugs to take away pain and symptoms of Arachnoiditis, but don't want to go down the route of morphine... yet !!

Best wishes Ann and fellow 'Aword' members.

Love Helen x
