

STEM CELLS

Posted by helen - 27 Mar 2006 11:18

Dear Doc Sarah

I have asked this question before, but did not receive a response.

Do you have any thoughts on stem-cell treatment for "A"? There has recently been 2 success stories for MS sufferers in the newspapers and the BBC have a programme in the pipeline. I have been researching case histories and although there is still a lot of scepticism I would really appreciate your general opinion either personal or professional!

Thanks Helen

Dear Helen,

sorry not to have responded to your query.

I don't think stem cells are going to be the answer for arach. at least in the foreseeable future.

Regards,

DocSarah
