The aim of this article has been to outline various neurological problems commonly associated with arachnoiditis.

Other similar neurological disorders such as Multiple Sclerosis and Reflex Sympathetic Dystrophy will be dealt with in separate articles.

Neurology is a complex specialty and one can only touch uponFurther details on the medication mentioned within the article are available from within other articles on this website

Sarah Smith (nee Andreae-Jones) MB BS

Patron of the Arachnoiditis Support Groups

June 2001.

(This is a sample of the various problems people could not explain properly or understand what was happening to them. Hopefully this website you will find answers, if not email us and we will help to answer your queries ED)
